♦ Abcoude, Amsterdam   i Date of birth : 25-11-1976, Location : Spain

As summary about myself I have to say, ...my past was related with the architecture, nowadays I am very happy working as programmer. After a few years struggling with my own architecture firm due to the crisis, I decided to switch up my career moving out my activity to the IT field and actually, I have to say it was the best decision ever.

I am a driven Front-end developer who can deliver responsive designs and web applications without any problems. I am used to working with programming languages such as HTML, CSS and JavaScript / TypeScript, frameworks such as ReactJS, Svelte, Gatsby or Bootstrap, and backend stuff such as NodeJS, Express and MongoDB. In addition, I have good skills with development tools such as VSCode, Contentful, Npm, Yarn or Gulp. Because of my interest in the latest technologies I have been working hard since a while ago with Rust Programming.

Problem-solving capacity, leadership and communication skills are qualities that I have been able to develop strongly through my experience as an architect and project manager.

☰ Skills

Programming	HTML5, CSS3, JavaScript (ES5, ES6, TypeScript, jQuery, Ajax/Json, yarn/npm, Webpack, Rollup), NodeJS and Rust
Frameworks	React, Redux, GraphQL, StyledComponents, Svelte, Gatsby, Bootstrap, MaterialUI, MaterializeCSS, Foundation/Mail
Tools	Git/GitHub/Gitlab/Bitbucket, Jira, ClubHouse, Slack, Contentful, VSCode, Figma
Data Base	Express, MongoDG + Mongoose, Postman, Studio3T, Robo3T, MongoDB Compass, Insomnia
Andere	SVG + D3.js, Graphic design skills, Photoshop/Illustrator, 3D rendering programs

💼 Professional Experience

Heden
December 2018

Front-end Developer | React/Redux at Ace and Tate, Amsterdam, The Netherlands
Maintenance and new implementations on the webshop (www.aceandtate.com).
> Home page built : navigation, banners, footer,..
> Integration with Contentful
> Product Collection Page.
> Product Detail Page
> Check out
> Newsletters
> VTO and ARkit Apple implementation
> Performance

`HTML` `CSS` `SASS` `JavaScript` `React` `Redux` `Thunks` `TypeScript` `Hooks` `Styled-Components` `GitHub` `Scrum` `ClubHouse` `Contentful` `VSCode` `CircleCI` `Netlify` `Parcel` `React Native`

November 2018
April 2018

Maart 2016
Juni 2015
	Junior Front-end Developer | Freelancer, Amsterdam, The Netherlands
	Despite my graduation with a Masters in Architecture, I started my development as a programmer in 2014. I now use my background and analytical skills while solving problems and creating possibilities. After being busy with HTML, CSS and Javascript for a few months, I gained professional work experience through a few freelance projects.
